The SAP on Azure Architecture Guide describes a set of guiding tenets that are used to help ensure the quality of SAP workloads running on Azure. This guide is based on the Microsoft Azure Well-Architected Framework, but the recommendations are specific to deployments of SAP solutions. A solid architectural foundation starts with five pillars of excellence: cost, DevOps, resiliency, scalability, and security.

The SAP on Azure Architecture Guide describes a set of guiding tenets that are used to help ensure the quality of SAP workloads running on Azure. This guide is based on the Microsoft Azure Well-Architected Framework, but the recommendations are specific to deployments of SAP solutions.

~~SAP on Azure Architecture Guide — github.com~~

The Azure CAT Patterns & Practices team has published their first reference architecture on SAP NetWeaver and SAP HANA on Azure, which covers SAP workloads running in Azure. It provides prescriptive guidance on how to run SAP HANA on Azure including the following topics:

~~Reference Architecture for SAP NetWeaver and SAP HANA on ...~~

This reference architecture depicts a simple scale-up scenario to demonstrate core concepts in the deployment and operation of an SAP HANA system on Azure. For options, see other installation scenarios for HANA Large Instances. This architecture consists of the following infrastructure components.

~~Run SAP HANA on Azure (Large Instances) — Azure Reference ...~~

This Quick Start reference deployment guide provides best practices and step-by-step instructions for deploying SAP S/4HANA on the AWS Cloud. This Quick Start is for SAP architects, system administrators, and IT technical professionals who are responsible for architecture design and the deployment of S/4HANA workloads on AWS. SAP S/4HANA on AWS

~~SAP S/4HANA on the AWS Cloud — SUSE Linux~~

The guide has been composed by members of SAP product teams, subject-matter experts, and consultants - in collaboration with ASUG (Americas' SAP User Group) and DSAG (the German-speaking SAP User Group). It has three parts: "Part One" is dedicated to the key decisions to be made when planning your approach to your SAP S/4HANA transition.

~~CIO and Customer COE Guides — SAP~~

A Reference Architecture for SAP Solutions on Dell and SUSE 7 Local Disk You don't need local disks with Dell PowerEdge servers, but you can use them. You can boot VMware ESX from redundant imbedded SD cards, or from a local RAID1 pair of disks. Without a hypervisor the server can boot from SAN or boot from a local RAID1 disk pair.

~~A Reference Architecture for SAP Solutions on Dell and SUSE~~

This reference document links the technical design aspects of Microsoft Azure with Palo Alto Networks solutions and then explores several technical design models. The design models include multiple options with all resources in a single VNet to enterprise-level operational environments that span across multiple VNets using a Transit VNet.
