Energy research at the TU/e is among the best in academic Europe (a February 2010 study by Reed Elsevier puts it second only to Imperial College London). This fact, as well as the unique attention to energy in the built-up environment, drew the attention of the European Institute of Innovation and Technology.

The research concentrates on formalisms for modeling and methods to discover and analyze models. Fundamental to the research group at the Eindhoven University of Technology is the choice for Petri nets as the language to precisely describe process dynamics also in complex settings at a foundational level.
