Rule 21 Interconnection. Electric Rule 21 is a tariff that describes the interconnection, operating and metering requirements for generation facilities to be connected to a utility's distribution system. The tariff provides customers wishing to install generating or storage facilities on their premises with access to the electric grid while protecting the safety and reliability of the distribution and transmission systems at the local and system levels.

Rule 21 Interconnection - California Public Utilities ... ?Establish applicability of Rule 21 only when bi-directional capabilities are activated and utilized ?Authorize V2G DC interconnections and make the appropriate modifications to the Rule 21 tariff and portal ?Direct a sub-group within Working Group #4 in this proceeding (R.17-07-007) to more deeply address V2G AC interconnection issues ?Clarify a pathway for parties to interconnect V2G AC systems on a timely basis for experimental and/or temporary use
