Section 12 4

~~Chemistry Matter And~~

~~Study Guide For~~

Now, we use the actual
yield and the theoretical

yield to calculate the
percent yield. Step 1:

List the known
quantities and plan the
problem. Known.

Actual yield = 14.9 g;

Theoretical yield = 15.7
g (from Part 12.11A)

Unknown. Percent yield
= ?

Acces PDF

Section 12 4

Percent Yield

~~Theoretical Yield and
Percent Yield - CK-12
Foundation~~

Percent yield represents the ratio between what is experimentally obtained and what is theoretically calculated, multiplied by 100%.

$\% \text{ yield} = (\text{actual yield}) / (\text{theoretical yield}) * 100\%$ So, let's say you want to do

Acces PDF

Section 12 4

an experiment in the lab.

You want to measure

how much water is

produced when 12.0 g

of glucose

($C_6H_{12}O_6$) is

burned with enough

oxygen.

~~Percent Yield~~

~~Chemistry | Socratic~~

The theoretical yield is

what you calculate when

you do a calculation on

Acces PDF

Section 12 4

paper or before you do a reaction in a lab. The actual yield will always be less than the theoretical yield because no chemical reaction ever reaches 100 percent completion. In a lab setting, there's always some amount of error, whether it's big or small.
