and shaft alignment.
The primary reasons why machinery is misaligned is lack of proper training, improper tools to do the job, and that people are not given enough time to do it right.

*ABS | The American
Edition John
Bureau of Shipping
Piotrowski*

Alignment of the shaft is necessary when the motor or driven machinery is new or when it is dismantled due to improper running. Moreover, as the name suggests, the main purpose of shaft alignment is to make sure that the center line

File Type PDF
Shaft Alignment
of the motor rotor shaft
coincides with the
center line of the driven
machinery i.e., pump or
a generator.
