Read PDF Sheep Heart Dissection Lab Answer Key

The following is the procedure for the actual dissection. Read through the lab and answer the questions using the websites above as resources. Procedure: Observe the sheep heart ventral surface up (See Figure 1 below). Figure 1. On the outside of the heart is the visceral pericardium, which is a thin, transparent layer on the surface of the heart. Under this is the myocardium.

~~Sheep Heart Dissection Lab~~

Identify the right and left sides of the heart Obtain a sheep heart and place the heart in a dissecting tray. Imagine the heart in the body of a person facing you. The left side of their heart is on their left, but since you are facing them, it is on your right. Position your heart in the tray so that it matches the diagram below.

~~Sheep Heart Dissection~~

A sheep heart dissection involves cutting into particular areas of a sheep's heart so that we can see each of the different sections and learn more about what each part of a heart looks and feels like. A sheep's heart and sheep internal anatomy are very similar to a human, so it gives us an opportunity to learn more about what a human heart might look like on the inside.
