Dehumidifiers help to remove humidity from the air to prevent the build up of condensation, often used to solve damp and mould problems within the home or office. They remove moisture by drawing air into the unit and passing this through specially cooled coils which attracts the moist air, collecting it in a tray, and blowing the dried air back out. A range of tank capacities and unit sizes ...

Dehumidifiers | Ventilation | Screwfix.com

Refrigeration dehumidifiers function by drawing air over a refrigerated coil, which condenses the moisture in the air to remove it. Dessicant dehumidifiers, on the other hand, draw the air over a wheel that is coated with a dessicant--a material that absorbs water.
