Introduction. These documents

are intended to help describe how to undertake analyses introduced as examples in the Stats: Data and Models (Fourth edition, 2014) by De Veaux, Velleman, and Bock. More information about the book can be found at http://wps.aw.com/aw_deveaux_stats_series.

This work leverages initiatives undertaken by Project MOSAIC, an NSF-funded effort to improve the teaching of statistics, calculus, science and computing in the undergraduate curriculum.

Introduction - Amherst College

Richard De Veaux, Paul Velleman, and David Bock wrote Stats: Data and Models with the goal that students and instructors have as much fun reading it as they did writing it. Maintaining a conversational, humorous, and informal writing style, this new

edition engages students from the first page.

Stats: Data and Models, Global Edition | Angus & Robertson
Book Description. An Introduction to Generalized Linear Models, Fourth Edition provides a

cohesive framework for statistical modelling, with an emphasis on numerical and graphical methods.This new edition of a bestseller has been updated with new sections on non-linear associations, strategies for model selection, and a Postface on good

statistical practice.

An Introduction to Generalized Linear Models - 4th Edition ...
A guide that provides in-depth coverage of modeling techniques used throughout many branches of actuarial science, revised and

updated Now in its fifth edition, Loss Models: From Data to Decisions puts the focus on material tested in the Society of Actuaries (SOA) newly revised Exams STAM (Short-Term Actuarial Mathematics) and LTAM (Long-Term Actuarial

Mathematics).

Loss Models: From Data to Decisions, 5th Edition | Wiley
The chapters on binary data and on count (Poisson) data are excellent in this regard. Hardin and Hilbe give ample attention to

the problems of overdispersion and zero inflation in count-data models. The final part of the text concerns extensions of GLMs. First, the authors cover multinomial responses, both ordered and unordered.

Generalized Linear Models and Extensions, Fourth Edition
The top row of the figure shows the number of new COVID-19 deaths reported in the United States each week from August 29 through October 31 and forecasted new deaths over the

next four weeks, through November 28. The bottom row of the figure shows the number of total COVID-19 deaths in the United ...
