Calling changes in the stock market as Stock market cycles a "cycle" is a misnomer, because of its non-cyclical nature. Changes in stock returns are primarily determined by external factors such as the U.S. monetary policy, the economy, inflation, exchange rates, and socioeconomic conditions. Intellectual capital does not affect a company stock's current earnings. Intellectual capital contributes to a stock's return growth. Milton Friedman believed that for the most part, exc

~~Stock market cycles~~—Wikipedia
A stock market, equity market or share market is the aggregation of buyers and sellers of stocks (also called shares), which represent ownership claims on businesses; these may include securities listed on a public stock exchange, as well as stock that is only traded privately, such as shares of private companies which are sold to investors through equity crowdfunding platforms.

~~Stock Market Cycles~~—Historical Chart | MacroTrends
The business cycle, also known as the economic cycle or trade cycle, is the downward and upward movement of gross domestic product (GDP) around its long-term growth trend. The length of a business cycle is the period of time containing a single boom and contraction in sequence. These fluctuations typically involve shifts over time between periods of relatively rapid economic growth (expansions ...

~~Business cycle~~—Wikipedia
In my opinion this makes that statement unusable for the Wikipedia article and it should be removed or replaced. Stock Market Cycles is a very broad area, so focusing on a single book by one author, and that too a non-scientific one, is in a way harmful to the subject and the readers.

~~Talk:Stock market cycles~~—Wikipedia
