Indoor training, however, is not easy on the body; it typically involves constant work that demands multi-joint, total body competency to hold form, posture, and muscular tension. With the right strength and conditioning preparation, this doesn't need to be as complicated as it sounds—and now is the perfect time to bulletproof your body for the winter and beyond.

Unfortunately, most confuse training objectives (e.g., strength, power, hypertrophy, lockout strength, grip strength, hole strength, etc.) and training blocks sets and reps schemes. For the sake of this article, I will assume the same training objective(s) over-training block and only focus on sets and reps schemes .

Several studies show that doing one set per muscle builds just as much strength as doing three sets per muscle, at least for the first three or four months of training. If you're a novice or if you're starting again after a layoff, begin with one set of 10 to 12 repetitions, and make sure your last rep feels challenging.

Strength Training for Boxing Boxing is a sport which requires a combination of explosive strength, speed, and endurance, all of which need to be developed in your training. However, strength training for boxing involves more than merely adding resistance to a fundamental's workout—such as adding resistance bands to your strike training—since doing so can alter your form for the worse.
