Welding Submerged Arc Welding Hobart Brothers  
Hobart Filler Metals provides a complete offering of submerged arc  
welding fluxes, wires, and strips that provide best-in-class performance  
when welding or cladding carbon steels, low-alloy steels, stainless  
steels, and nickel-based alloys. State-of-the-art production technology  
ensures wire and flux consistency for reliable welding performance.  
SWX agglomerated fluxes are protected from moisture pickup by  
exclusive EAE (Excess Air Evacuation) packaging, which helps to  
minimize the risk of ...

Submerged Arc - Hobart Brothers Performance Welding Products  
Submerged arc welding flux does much more than simply protect the  
weld. The right flux can help give you the best balance of properties  
and performance for optimized results. Always consider the wire and  
flux combination for any application — no matter how simple or  
complex.

## Submerged Arc Welding Hobart Brothers

This cored submerged arc welding wire improves deposition rates and offers a broader penetration profile than solid wire at comparable welding parameters for higher productivity and less risk of burn-through.

## Structural Welding Wires, Flux and Rods | Hobart Filler ...

Ohio-based Hobart Brothers has released a new FabCO® Triple 7 gas-shielded flux-cored wire with expanded mechanical properties. Released this week (9 th Nov), the Triple 7 wire is suitable at welding with mixed gases (75% to 85% argon/CO2 balance) and is also usable with straight CO2. The wire has ...

Given the stringent requirements of ASME codes, porosity is a costly defect that compromises weld integrity and leads to countless hours of rework. After discussing the complications with his local welding distributor and representatives from Hobart Brothers, Buckmeier decided to try the Metalloy EM12KS metalcored sub-arc wire in conjunction with Tri- Mark ' s HPF-A95 flux.

Submerged Arc Welding Hobart Brothers

The submerged arc welding (SAW) process has been around for over 75 years, yet fundamental practices of SAW still are not well-understood in industry today. With most welding manufacturers offering high-speed inverters with advanced control over the waveform, there can be a temptation to ignore the fundamentals of SAW when either troubleshooting or increasing welding efficiency.
