Sun Fire V210 and V240 Servers Administration Guide

The Sun Fire V210 and V240 servers each have four autonegotiating 10/100/1000BASE-T  
Ethernet system domain ports. All the Ethernet ports use a standard RJ-45 connector, the  
transfer rates for which are given inTABLE 6. In addition, each server has one 10BASE-T  
Ethernet management domain interface, labelled NET MGT.

## Solved: Sun Solaris v210 Sunfire question | Experts Exchange

Sun Fire is a series of server computers introduced in 2001 by Sun Microsystems (since 2010, part of Oracle Corporation). The Sun Fire branding coincided with the introduction of the UltraSPARC III processor, superseding the UltraSPARC II-based Sun Enterprise series. In 2003, Sun broadened the Sun Fire brand, introducing Sun Fire servers using the Intel Xeon processor.
