'Mindware' and 'Superforecasting' - The New York Times
Science with a touch of art has replaced mysticism as the preferred method of foretelling what lies ahead The word "Superforecasting" doesn't carry any hidden meaning. "Super" means far above average, and "forecasting" is the act of making predictions. So, Superforecasters are simply much better than most people at calculating what lies ahead, whether the ... Continued

The Prediction Trade - luckbox magazine
Superforecasting: The Art & Science of Prediction – Summary In a landmark study undertaken between 1984 and 2004, Wharton Professor Philip Tetlock showed that the average expert's ability to make accurate predictions about the future was only slightly better than a layperson using random guesswork.

Superforecasting: The Art & Science of Prediction - Summary
This is the key question that University of Pennsylvania Professor of Political Science and Psychology Philip Tetlock has devoted much of his career to, culminating in a series of research conclusions laid out in his and co-author Dan Gardner's most recent book, Superforecasting: The Art and Science of Prediction.
