Systems Applications And Products Guide

Overview. Systems, Applications, Products in data processing, or SAP, was originally introduced in the 1980s as SAP R/2, which was a system that provided users with a soft real-time business application that could be used in multiple currencies and languages. As client–server systems began to be introduced, SAP brought out a server based version of their software called SAP R/3, henceforth referred to as SAP, which was launched in 1992.
