Synopsis. The next level of breakthrough thinking in organizational learning, leadership, and change Harvard professor Amy Edmondson shows how leaders can make organizational learning happen by building teams that learn. Based on years of research and case studies from Verizon, Bank of America, and Children's Hospital, Edmondson outlines the factors that typically prevent groups from learning, such as the fear of failure, groupthink, power structures, and information hoarding.

Teaming: How Organizations Learn, Innovate, and Compete in ...

The pace of change and the fluidity of most work structures means that it's not really about creating effective teams anymore, but instead about leading effective teaming. Teaming shows that organizations learn when the flexible, fluid collaborations they encompass are able to learn. The problem is teams, and other dynamic groups, don't learn naturally.

Teaming: How Organizations Learn, Innovate, and Compete in ...

Teaming shows that organizations learn when the flexible, fluid collaborations they encompass are able to learn. The problem is teams, and other dynamic groups, don't learn naturally. Edmondson outlines the factors that prevent them from doing so, such as interpersonal fear, irrational beliefs about failure, groupthink, problematic power dynamics, and information hoarding.

Managers need to stop thinking of teams as static groups of individuals who have ample time to practice interacting successfully and efficiently, says Amy Edmondson in her new book, Teaming: How Organizations Learn, Innovate, and Compete in the Knowledge Economy. Editor's note: Many managers are taught to think of teams as carefully designed, static groups of individuals who, like a baseball team or improv comedy troupe, have ample time to practice interacting successfully and efficiently.
