Alimak Scando 650 Us Construction Hoists

Technical Description ALIMAK SCANDO 650 Construction Hoists

The 650 modular system that can adapt to different applications using relatively few modules and components. The Alimak Scando 650 offers payloads of 1,500 kg to 3,200 kg per car and has a standard maximum lifting height of 250 m, which can be increased up to 400 m on request. No applications are too difficult

ALIMAK SCANDO 650

With internal car lengths up to 5 m, a width of 2 m and a height of 2.8 m the new Alimak Scando 650 XL surpasses all existing standard construction hoists operating on a single mast. By using a forklift truck or a board transit bench the loading and unloading of bulky materials can be done easy and ergonomically.

ALIMAK SCANDO 650 XL

The 650 modular system that can adapt to different applications using relatively few modules and components. The Alimak Scando 650 offers payloads of 1,500 kg to 3,200 kg (3,300—7,054 lbs) per car and has a standard maximum lift - ing height of 250 m (825 ft) , which can be increased up to 400 m (1,300 ft) on request. No applications are too difficult
