Telepresence Management Suite User Guide | bookstorrent.my.id

Introduction. The Telepresence Management Suite (TMS) is a management platform for Telepresence networks and allows monitoring of video resources, along with providing easy scheduling for video meetings. Another key feature is TMS ' ability to provide usage reports on a customers Telepresence network. TMS is a paid for application and often purchased as part of a Telepresence deal, however there are occasions where a customer will not have TMS.

The TelePresence Management Suite (formally Tandberg Management Suite) is scalable, easy-to-use and integrates with existing applications to increase your return on investment.

TelePresence Management Suite
Cisco TelePresence Management Suite (TMS) software implements a Simple Object Access Protocol (SOAP) interface that by design allows unauthenticated access to web services designed to provide management features to devices. At first publication of the advisory, the management feature was not documented and may have represented unknown risks to customers implementing the feature within their environments.
