the Cretaceous period around 65 million years before. Facts about Dinosaurs.

## *12 Interesting Facts about Dinosaurs - A1FACTS*

Dinosaurs walked the earth for over 165 million years. They lived during a period of time known as the Mesozoic Era, or Age of Reptiles. At the end of the Cretaceous Period they became extinct – that was around 65 million years ago. During this time there was a great deal of volcanic activity and many earthquakes.

## *Dinosaur Worksheets, Facts & Prehistoric Information For Kids*

Dinosaurs were on earth for around 160 million years, starting from the Triassic period around 230 million years ago and through the Jurassic period, until the Cretaceous period around 65 million years ago. This era is also called the Mesozoic era and is the era in which dinosaurs developed and ultimately became extinct.

## *Facts & Information about Dinosaurs for Kids*

The first dinosaurs evolved during the middle to late Triassic period—about 230 million years ago—in the part of the supercontinent of Pangea that now corresponds with South America. Before then, the dominant land reptiles were archosaurs (ruling lizards), therapsids (mammal-like reptiles), and pelycosaurs (typified by Dimetrodon).
