Built Environment Collaborative is an initiative to bring boundary fields of architecture, planning, technology, and sustainability studies at a conjecture to construct a holistic perspective for designers and professionals to influence the future course of development. .

Built Environment Collaborative — Habitat Studies ...  
Built Environment. Our built environment includes all the human-made physical spaces where we live, recreate and work. These include our buildings, furnishings, open and public spaces, roads, utilities and other infrastructure. These structures and spaces affect our health by bringing pollutants into our environments and by allowing or restricting access to physical activity, transportation and social interactions.

Home | Association of Collaborative Design  
The Built Environment: A Collaborative Inquiry Into Design and Planning. This book takes a sweeping view of the ways we build things, beginning at the scale of products and interiors, to that of regions and global systems. In doing so, it answers questions on how we effect and are affected by our environment and explores how components of what we make—from products, buildings, and cities—are interrelated, and why designers and planners must consider these connections.

The Built Environment: A Collaborative Inquiry Into Design ...  
Be - Collaborating for the built environment. Improving PFI through collaborative working. Executive summary. Be is the leading independent built environment supply chain body whose 100 or so members embrace the whole demand and supply chain from corporate and public sector clients to developers, facilities managers, contractors, consultants, specialists and product suppliers, including most of the major construction firms engaged in PFI consortia.
