Disaster Recovery

Government of New York

It is hard to generalize, but studies show average recovery time from a natural disaster is 16 days.

However, more alarmingly, 30% of the affected organizations never recover. Natural disasters typically top the mental checklist, but they are only the third most critical adverse event impacting Business Continuity.

Management should identify key business processes and activities to be maintained while IT systems and applications are unavailable and prioritize the order in which these systems are restored, which should be reflected in the BIA. In addition, management should develop a coordinated strategy for the recovery of data center s, networks, servers, storage, service monitoring, user support, and related software.
