The Faith of a Scientist by Henry Eyring - Goodreads  
The scientific methods were initiated by Christians of the past, and many Nobel Prize winners in Science have been Christians. A recent study of professional scientists I think put the number of Christians in the field today at around 40%. The issue is not science vs Christianity, there is no battle between them.

Faith of the Scientist – RESPOND  
A belief in a Supreme Being, faith in the efficacy of a moral code, and a belief in a purpose in existence are not precluded by science, though science may question the credibility of a particular religious belief and thus serve as a constraint on religion. But men tend to hold beliefs associated with their religious faith inflexibly, a consequence of their all-too-frequent failure to acknowledge the limited ability of man to receive through revelation a perfect comprehension of truth.

The arguments about whether such untestable theories constitute science at all have been raging for years, and the account of them offered in Lost in Math is thorough and accurate but sometimes rather technical. What makes the book compelling reading, however, is that it is not so much a polemic as a forlorn confession of Hossenfelder's crisis of faith.

Einstein speaks of the "profound faith" of the scientist in the rational intelligibility of the universe. He could not imagine a scientist without it. For instance, scientists believe (= have faith) that electrons exist and that Einstein's theory of relativity holds because both are supported by evidence based on observation and experimentation.

It was a refreshing view in a world that puts science and religion at odds with each other. A Few quotes: "Faith is feeling good about myself, feeling good about God, and muddling along after truth as best I can." "The significant thing about a scientist is this: he simply expects the truth to prevail because it is the truth.
