The US M1 helmet is perhaps one of the most iconic items of military equipment, made famous not only in period photographs from the Second World War and Vietnam, but also from numerous war films such as the D-Day epic, The Longest Day, or Audie Murphy's story, To Hell and Back. It was during the First World War that the need for a modern combat helmet was first recognised.

The M1 Helmet of World War Two
the "steel pot"

THE M1 STEEL HELMET Adopted shortly before the United States entry into WWII, the first production M1 helmet shell was made of manganese steel coated in cork aggregate and dark olive drab paint. This combination gave the helmet a dark, coarse, appearance and texture.

The American M1 helmet and the German Stahlhelm can rightly be called the best helmets of the Second World War. M1 helmet Unlike the Stahlhelm, which was made in several sizes, the M1 was made in one size. Thus, American factories simplified the production process and reduced the burden on military logistics systems.

The M1 helmet shell is made of manganese steel. Early helmet shells have a stainless steel rim with the seam in the front. In 1944 the rim was changed to the same manganese steel as the helmet and the seam was moved to the rear. Helmet shells were made by the Schlueter Manufacturing Company and McCord Radiator and Manufacturing Company.
