The Order of Things - Wikipedia

The Order of Things is Foucault at his most Foucauldian, a grand tour through the history of orderings, discourses, scientific methods, and ultimately Man Himself from the 16th century through the 19th century. He's at his best when he's making the incommensurable theological commentaries of the 16th century readable and relateable for modern eyes.

He dips into literature, art, economics and even biology in The Order of Things, possibly one of the most significant, yet most overlooked, works of the twentieth century. Eclipsed by his later work on power and discourse, nonetheless it was The Order of Things that established Foucault's reputation as an intellectual giant. Pirouetting around the outer edge of language, Foucault unsettles the surface of literary writing.

The Order of Things: An Archaeology of the Human Sciences (1966) is nothing less than a genealogy of ideas, an intellectual ancestry of the Western mind. Along the way, Foucault somehow manages to retrace the entire development of science, restricting his analysis to a specific slice of spacetime: European culture since the 16th century.

The title "The order of things" covers the story and themes well. The story is about the order of things seen from Carl and Lily's view. They are so much in love and they almost forget to think rationally. They are "hypnotized" by their feelings: "Feeling came first and thought came after; that was the order of things" (p 3, l. 24).

Order is, at one and the same time, that which is given in things as their inner law, the hidden network that determines the way they confront one another, and also that which has no existence except in the grid created by a glance, an examination, a language; and it is only in the blank spaces of this grid that order manifests itself in depth as though already there, waiting in silence for the moment of its expression.

The Order of Things Quotes by Michel Foucault

Up until the 17th century, the world was “ordered” (in the West) in terms of “resemblance” or the repetition of the things through the world in speech and writing. By virtue of similitude the world had to “fold in upon itself, duplicate itself, reflect itself, or form a chain with itself so that things can resemble one another.” And then a change occurred and the “arrangement of signs was to become binary..as the connection of a significant and a signified.”
