As Mickey and Gary strung popcorn, their mother told them about olden  
days and the decorations from her childhood. There were balls of blown  
glass, real candles, an angel with wings of silver, and a small,  
fragile birds with tinsel tails. And jumping jacks on strings. I  
wonder if they could still be in the house where...

Also known as the Popcorn Tree, the Chinese Tallow Tree is one of the  
top 10 most invasive plants in Mississippi. Popcorn trees spread like  
wildfire, overtaking native vegetation, damaging wildlife habitats,  
and destroy nature's balance. Popcorn trees have distinct, heart-  
shaped leaves, dangling yellow flowers, and fruit that looks like  
popcorn. To report a Chinese Tallow (Popcorn Tree), visit the Popcorn  
Tree Control Program.

*Croton sebiferum* L. *Sapium sebiferum* (L.) Roxb. *Triadica sebifera* is a tree native to to eastern China and Taiwan. It is commonly called Chinese tallow, Chinese tallowtree, Florida aspen, chicken tree, gray popcorn tree, or candleberry tree, The seeds (as well as from those of *Triadica cochinchinensis*) are the sources of stillingia oil, a drying oil used in paints and varnishes.

~~Triadica sebifera — Wikipedia~~

Chinese tallow tree, also known as popcorn tree or Florida "aspen," is native to eastern Asia. Unfortunately, plants like tallow trees, kudzu, privet, mimosa, Japanese honeysuckle, chinaberries, and a host of other Asian plants that may not pose problems in their native countries have created colossal invasive nightmares in the southern U.S.

According to the FLEPPC, (Florida Exotic Pest Plant Council), "The Tallow Tree or Popcorn Tree is considered a common agricultural weed in Taiwan, requiring constant effort and expense to hold at bay". The tree survives in freshwater and saline soils equally well, its range into natural areas known to disrupt naturally occurring plant communities.

Today, popcorn garlands are considered to be a classic American Christmas decoration, but they actually date back to Victorian England: American colonists in Williamsburg, Virginia, spruced up their own trees with popcorn as early as 1842. German-Americans helped to cement popcorn's status as an iconic Christmas tree decoration in the early twentieth century (they dyed it different colors and ...

Wollemia nobilis has been named a 'living fossil' or a 'dinosaur tree' because it represents the only remaining member of an ancient genus, dating back to the time of the dinosaurs. From an evolutionary line thought to be long extinct, a population of living Wollemi pines were discovered in 1994 growing in a rainforest gorge in Australia...
