Sett also depends on the slipperiness of the yarn. A slick reeled silk or shiny rayon will need to be sett tighter than a spun silk, smooth cotton, or silk noil of the same diameter to be stable. Woolen and worsted wools will take somewhat different setts as will tow and line linen, mercerized and unmercerized cottons, etc.

~~Understanding sett | Weavolution~~

Peggy's Weaving Tips > About sett. The sett is the density of the warp. It is the number of ends (warp threads) per inch (epi). The sett you choose depends on the yarns, the weave structure (e.g., plain or twill, etc.) and the intended purpose of the finished piece (e.g., a loosely-woven shawl or upholstery in a tight, firm weave, or anywhere in between). It is obvious that a thin thread like sewing thread would have more threads per inch than a fat, wool yarn.

~~Peggy's Weaving Tips > About sett — Peggy Osterkamp's ...~~

Those three numbers at end of each listing are the setts: 16 for lace, 20 for plain weave, and 24 for twill. Each of the three ought to produce a well made cloth when woven as a balanced fabric (i.e. the same picks per inch as ends per inch) in the corresponding structures.

~~Deciding on a sett — Weaving With Janet Dawson~~

Yarn selection and sett are at the heart of what makes woven cloth great. When pondering the question of sett, fabric design, and yarn substitution, an underused resource by rigid-heddle weavers is a sett chart. A sett chart is a list of yarns described in generic terms, their yardage, and a range of suggested setts.

~~Geeking out on Sett Charts — Yarnworker — Know how for the ...~~

In the piece woven at 4 epi with a very fat weft bundle, the weaving has a lot of texture and the horizontal lines are quite wavy. Tapestry sett example, 4 epi on 12/15 cotton seine twine warp with 6 strands of Harrisville Designs Koehler singles. In the piece woven at 8 epi, the weaving has less texture and the horizontal lines are less wavy.

~~Sett: What does it have to do with tapestry weaving ...~~

April 16, 2018 by Liz. To get the cloth you want, the secret is in the sett. To guesstimate sett, the spacing of the yarn in the rigid-heddle reed, conventional wisdom has the weaver wrapping yarn around a ruler for an inch, allowing the yarns to sit next to each other, not invade each other's space, and be in a semi-relaxed state.

~~Meet the Sett Checker — Yarnworker — Know how for the ...~~

If you are doing plain tabby weave, $wpi / 2 = epi$. So if your yarn had 24 wraps per inch, you will want 12 ends per inch in your warp. If you are doing a standard twill weave, $wpi * 2/3 = epi$. So if your yarn has 24 wraps per inch, you will want 16 ends per inch in your warp.

*However!

~~Calculating WPI, EPI & Sett in Weaving~~

Table of Recommended Setts for Weaving: cotton, linen, silk yarns. The sett of your cloth can vary, depending on your yarn and the desired drape of your fabric. Below is a table of recommended setts. To achieve the correct result, it is best to sample. Weave a small section, and wash your sample before continuing with your project.

~~Beginner Weaving — Table of Setts — All Fiber Arts~~

The average-sized sett for a kilt in modern times is 5 to 6 inches (12 - 15 cms) which gives around 250 threads per sett using a medium weight wool yarn. If of course you were using a much thinner yarn such as silk then that thread count could multiply by three or four.

~~Thread Counts | Scottish Tartans Authority~~

Sett = $35 - ((2 * 35) / (2 + 4))$ Sett = 23.4; The result can be rounded

~~How to determine sett — YouTube~~

In terms of sett, that reed is what determines and maintains the sett. An 8-dent reed holds 8 warp ends per inch in perfect alignment. No other weaving tool does it this well. Pipe looms and sett. Many tapestry weavers use pipe looms of some kind. Simple to use and very versatile, they are a great choice.

Tartan, mostly associated with Scottish culture, is a woven cloth consisting of a criss-cross pattern, known as the sett. Recognised the world over as a symbol of Scottish heritage, Tartan is used to create Scottish kilts, bagpipes, scarfs and other fashion items. Have you ever wondered how this iconic material is made?

~~How is Tartan Made? | News, Events & Updates from ...~~

Double Binding (Dubbelbinding) is a type of double-faced weave that is used mainly for rugs and blankets. Two sets of weft are woven, and the wefts switch places on opposite sides of the woven article. When used for rag rugs, this makes a sturdy, double-thickness rug.
