Trade And Public Health The

Trade and public health. WHO works to achieve greater policy coherence between trade and health policy so that international trade and trade rules maximize health benefits and minimize health risks, especially for poor and vulnerable populations. The focus is to strengthen capacities in the ministries of health to best enable them to work effectively with their colleagues in the ministries of trade, commerce and finance in efforts to shape and manage the trade policy environment for health.

Gabriel Siles-Brügge, Associate Professor in Public Policy, University of Warwick, EPHA Scientific Advisor on Trade Policy. The coronavirus crisis has thrown the link between trade, investment and health into sharp relief. The world has experienced an unprecedented global pandemic that has caused a significant slump in trade and cross-border capital flows.

COVID-19, trade and investment and public health - EPHA

The UK's Post-Brexit trade agreements should embed the UK Government's commitments to 'do no harm' to the public's health, including to ensure "a high level of human health protection". The right to health should be explicitly embedded into the UK's future trade policy and negotiating positions, which should be both compliant with and measured against it

Negotiating a 'healthy' trade policy for the UK
Globalization and the rise of international trade of goods and services in terms of volume and speed influence human health. This influence can be both positive and negative. Our work on "trade and health" is all about harnessing and maximizing opportunities

Trade and Public Health: The WTO, Tobacco, Alcohol, and Diet

TRIPS and public health. The WTO Doha Declaration on the TRIPS Agreement and Public Health, agreed by WTO members in 2001, helped to frame the health policy context of the intellectual property system. It stressed the need for the WTO Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS Agreement) to be part of the wider national and international action to address public health problems afflicting developing countries and least-developed countries.
