Tree Thinking: An Introduction to Phylogenetic Biology ...

It starts by discussing tree thinking in relation to individuals and species, then proceeds to consider character evolution, and then develops the idea of gene trees within species trees. It ends by discussing the usual tree-inference methods, such as parsimony, minimum distance, maximum likelihood, and Bayesian methodology, and finally presents statistical hypothesis testing.

Tree Thinking: An Introduction to Phylogenetic Biology ...

the process whereby organisms not closely related, independently evolve similar traits as a result of having to adapt to similar environments or ecological niches What do convergent evolution and common ancestry have in common? The tree of life (of the Domains) is largely based on what kind of data? from many sequenced genomes
