Vergason Technology, Inc. -Vacuum Metalizing Services Recent developments in PVD coatings include "soft" coatings such as molybdenum disulfide (MoS2) for dry drilling applications. Combination soft/hard Page 36/43

coatings, such as MoS2 over a PVD TiN or TiAlN, also show great potential, as the hard (TiN or TiAlN) coating provides wear resistance while the softer, more lubricious outer layer expedites chip flow.
