In the mid 1980s, Uniden, a Japanese company, bought out the Bearcat scanner line and Uniden's first Bearcat scanner was the BC800XL model. Most of the models discussed in this article are base/mobile units made by Electra during the 1970s and 1980s although some of the capacitor failures occur in the Uniden BC800XL, too.

I have a Uniden Bearcat BC60XLT-1, which recently replaced my old Radio Shack PRO-70. I have an old CB antenna I modified to work with VHF, but it's on the fritz, so I haven't tried it with the new scanner yet. The "rubby ducky" works adequately well for the railfanning environment I operate in, so it's no big deal.

It mods a 30 channel Bearcat BC60XLT-1 to an 80 channel! A very simple mod, really, and I've confirmed it works by doing it. You just open the radio to the logic board is exposed. Under the microprocessor there is a number "1" printed on the board. Below this number you see two solder pads. Just bridge these two pads together and you got 80 chs.

To program frequencies into a base model Uniden Bearcat Scanner, connect the antenna, power up the scanner, and press the "Prog" key until the letters "CH" blink on the display. Select a storage bank for the first frequency, such as Private, Fire/EMG or Police, and enter the frequency using the numeric keypad.
