The Uniform Building Code (UBC) was a building code used primarily in the western United States. History. The UBC was first published in 1927 by the International Conference of Building Officials, which was based in Whittier, California. It was intended to promote public safety and provided standardized requirements for safe construction which would not vary from city to city as had previously been the case.

~~Uniform Building Code - Wikipedia~~

Commonly referred to as UBC, this code was inaugurated in 1927 as an initiative of the International Council of Building Officials. The main intent of establishing the code was to promote public safety through the enactment of a singular standardized set of requirements for all safe construction works in all states of the USA.
