section is the cylinder block, a casing for the engine's main moving parts; the detachable upper cover is the cylinder head.

*The engine | How a Car Works*  
The engine cylinder is the part or space where fuel is admitted and reciprocating motion of the piston is obtained by burning it. The engine cylinder is characterized by its bore and stroke. Bore represents its inner diameter and Stroke is the effective length along which the piston reciprocates i.e. the distance traveled by the piston.
