A \_\_\_\_\_ is a named block of code that performs a specific task and does not return a value. procedure. A \_\_\_\_\_ is a named block of code that performs a specific task and does not return a value. executed.

Visual Basic 6 is based on BASIC language. It is more graphically designed for Windows Operating System that contains the use of screens, mouse and keyboard rather than textual format. Coding is Event oriented where the programmer writes instructions to define action that should occur in response to specific events.
