If Visual Studio for Mac is already open with a solution loaded, you can create a new solution by going to the menu bar and choosing File > New Solution. Creating a new solution this way closes the solution that is already loaded. Creating a New Project

Creating new Projects and Solutions - Visual Studio for ...
Create solutions and projects Projects hold the items needed to build your app in Visual Studio, such as source code files, bitmaps, icons, and component and service references. When you create a new project, Visual Studio creates a solution to contain the project. You can then add other new or existing projects to the solution if you want.
