MUM - MikroTik User Meeting

Vlan Configuration. The first step is to creat a bridge and add the trunk interface to the bridge. The trunk port is the port connecting to your managed switch. The commands are given below. int bridge add name=trunk. int

bridge port add bridge=trunk interface=ether1. int vlan add name=sales vlan-id=10 interface=trunk

Mikrotik VLAN with mutiple DHCP servers - Timigate

Mikrotik. ISP-A wishes to sell hotspot or PPPoE type128k Internet service where

ISP-B has coverage. ISP-B offers ISP-A 128k data only transport at a fee. ISP-A is now able to offer service to customer. This peering and service type is provided at layer 2, while separating the networks. Use VLAN VLAN Based Hotspot & PPPoE cont□d

NG-ABUJA-MUM Hotspot VLAN and User Manager - MikroTik Wiki Sub-menu: /interface vlan. Standards: IEEE 802.1Q. Virtual Local Area Network (VLAN) is a Layer 2 method that allows multiple Virtual LANs on a single physical interface (ethernet, wireless, etc.), giving

the ability to segregate LANs efficiently. You can use MikroTik RouterOS (as well as Cisco IOS, Linux and other router systems) to mark these packets as well as to accept and route marked ones.

Manual:Interface/VLAN - MikroTik Wiki

MikroTik User Meeting (MUM) is a conference on MikroTik RouterOS software and RouterBoard hardware. Ask questions, listen to presentations, talk with specialists and see interesting technology demos by MikroTik and the users themselves - all

here, at the MUM.

Mikrotik : VLAN configuration - YouTube

On your switch, make sure the port connected to the

Mikrotik is configured as a trunk port, configure the rest as access ports. Create vlans (which must be the same as those you have on your Mikrotik router) and assign ports to your vlans. Thats all.

How to create vlan on Mikrotik

Tunnels provided by

ISPs, are often delivered as QinQ, letting the customer add their own VLANs inside the ISP provided VLAN tunnel. QinQ 802.1ad are simply created by adding another 4 byte VLAN header to the packet. In MikroTik RouterOS, you can simply put a VLAN inside a QinQ VLAN,

by setting the interface of your own VLAN to the QinQ VLAN.
