Grade 6 Math Word Problems with Answers

(You stop at 36 because the problem says that this number is the least common multiple.) Let's pick 6 as a possible greatest common multiple because it's the largest factor of 12 other than 12. The multiples of 6 are 6, 12, 18, 24, 30, and 36. Six can go into 36 six times (6×6), 12 can go into 36 three times (12×3), and 18 can go into 36 twice (18×2), but 24 cannot.

Proportions word problems - K5 Learning

Practicing the operations individually helps build confidence, but an important word problem skill is figuring out which math operation is needed to solve a specific problem. The worksheets in this section combine both addition word problems and subtraction word problems on the same worksheet, so students not only need to solve the problem but they need to figure out exactly how to do it as well.
