Writing Os 2 Device Drivers
In this hands-on presentation, David Azewericz explains how you can quickly write and compile a device driver of OS/2, using one the frameworks available.

Writing OS/2 device drivers, the easy way - YouTube
also available as part of the OS/2 Online Book Collection CD-ROM. You can get the book, Writing OS/2 2.1 Device Drivers in C, 2nd edition. It's the only tutorial on writing OS/2 2.x device drivers. Call 1-800-842-3636 to order. Support for device driver writers is free via IBM's DUDE (Dynamic Upload and Download Environment). Periodically,

Writing Device Drivers - Getting the Most out of OS/2 Page ...
A common source of frustration among writers of OS/2 device drivers is the continued existence of the 16-bit assembler-based programming model. Device driver writers can't remove this frustration entirely, but they have been able to reduce it by writing in 16-bit C. We'd like to show you how the WATCOM compiler can

make your job easier.

Writing OS/2 Device Drivers with WATCOM C - EDM2
drivers and real-time applications for OS/2. The author of Writing OS/2 2.1 Device Drivers in C, Steve is regarded as one of the industry's leading experts in OS/2 and OS/2 device drivers. Steve can be reached at CompuServe @ 73354,746 or Internet @ stevemas@vnet.ibm.com. Device Driver Tips TIP: Install a small bootable partition to use when ...

Writing Device Drivers - Getting the Most out of OS/2 Page ...
edition of "Writing OS/2 2.x Device Drivers in C", scheduled for release later this year. Steve Mastrianni is an industry consultant specializing in device drivers and real-time applications for OS/2. The author of "Writing OS/2 2.1 Device Drivers in C," Steve is regarded as one of the industry's leading experts in OS/2 and OS/2 device drivers.

Writing Device Drivers - A Brief Look at OS/2 SMP Page 1of 3
Writing OS/2 device drivers is a hairy proposition, this book provided important insights into how to do it efficiently and elegantly. The code provided was rock-solid and stable, shaving months off of our development effort. Must have if you're on a serious time crunch.

writing os 2 device drivers - griem.herokuapp.com
Typically, the Logical Device Driver (LDD) is written by the operating system vendor, while the Physical Device Driver (PDD) is implemented by the device vendor. However, in recent years, non-vendors have written numerous device drivers for proprietary devices, mainly for use with free and open source operating systems.
