Writing Your First Clinical Study Report

Before reading a clinical paper, a great way to start is by scanning the whole article from start to end. This will give you a broad idea of the scope of the content and an overview of whether the hypothesis was met and how the methods and study design were used to gain results to draw a conclusion.

Clinical paper summary writing tips for medical writers

About this Publication. Students embarking on their first clinical research protocol are often daunted by the task at hand, particularly by the statistical terminology, concepts and the choice of appropriate statistical tests. The authors understand the difficulties and pitfalls students might encounter and have written an introductory text that will make writing that first protocol ‘a breeze’.

Juta | Writing Your First Clinical Research Protocol

Writing your case study The way you write is just as important as what you write. Use simple, conversational language to make your case study more accessible. Consider the following: • Use short words and sentences (aim for 15–20 words per sentence). • Use active not passive voice. Active voice means the subject of the sentence is doing the ...
