Year Million Science At The

This anthology of forecasts by scientists and researchers about the year 1 million A.D. is for advanced readers of scifi and those with a solid foundation and interest in physics. It covers topics such as the matrioshka brain, dyson swarms, kardashev type I and II civs, computronium, nanotechnology, and of the course the singularity.

Year Million: Science at the Far Edge of Knowledge by ...

Year Million is a six-part documentary and science fiction television series produced by National Geographic, which premiered on May 15, 2017, on their channel. The series received two Emmy Award nominations, including a Primetime Emmy for its narrator Laurence Fishburne. The series is based on the 2008 book Year Million: Science at the Far Edge of Knowledge by Damien Broderick. The narrative alternates between the years 2050, 3000, 500,000 and Year Million, using 2016 interviews to explain even

Year Million - Wikipedia

Their collective effort—first attempted by H. G. Wells in his 1893 essay “The Man of the Year Million”—is an exploration into a barely conceivable distant future, where the authors confront far-flung possibilities, at times bordering on philosophy of science.
