The intrinsic geometry of data sets or complex networks is not obvious, which becomes an obstacle in determining the dimensionality of real networks. Another challenge is that the definition of ...

Unveiling the dimensionality of complex networks through hyperbolic geometry

IXPE measures polarization of X-rays and was used to measure polarization from an X-ray pulsar for the first time, which allowed to constrain its basic geometry. "Hercules X-1 was the first X-ray ...

The geometry of a throuple is complex. With a couple, there's only a straight line connecting two dots. But introduce a third point, and so many more possibilities emerge - only one of which ...
