Zend Framework includes several action helpers by default: AutoComplete for automating responses for AJAX autocompletion; ContextSwitch and AjaxContext for serving alternate response formats for your actions; a FlashMessenger for handling session flash messages; Json for encoding and sending JSON responses; a Redirector, to provide different implementations for redirecting to internal and external pages from your application; and a ViewRenderer to automate the process of setting up the view ...

Manual - Documentation - Zend Framework

The Zend Framework is aimed at developers who do not want to have to dig through all the source code to get their job done and so the Zend Framework puts documentation on an equal footing with the code. This means that the core team will not allow new code into the framework unless it has accompanying documentation.

Zend Framework In Action - SlideShare

Possibly the most frequently asked questions about my book Zend Framework in Action is whether it is going to be updated. I'm delighted to be able to announce that Ryan Mauger (aka @Bittarman) and myself have agreed with Manning to write a new book on Zend Framework 2.0. to be called Zend Framework 2 in Action! It's very early days, so we have planned the Table of Contents, but have very little manuscript.

Zend Framework 2 in Action - Rob Allen's DevNotes

The book MIGHT be useful if you have already done a few projects with zend framework. however zend's documents would be more useful then. I guess you will learn easier and faster by those simple tutorials on the net (like Getting Started tutorial of zend or some beginner videos on the net). After that Framework's documentation would be enough.
